## New JA-89P wireless outdoor PIR detector available

The JA-89P is a wireless outdoor PIR detector designed to detect human body movement in an outside area.

It has a dual-zone PIR sensor made by Optex and houses an 868 MHz transmitter for communication with Jablotron's Oasis security system.

The JA-89P is powered by a long-life lithium battery and can report low-voltages to the Oasis system for efficient battery management. Any unauthorised opening or tearing off of the detector is instantly signalled.

The 300 metre radio range and 10 metre/90° PIR coverage allows a wide area to be monitored, and professional environmental approval to EN 50131-1 class 4 and an IP54 housing ensure its suitability for typically used outdoor environmental conditions.

Contact our Export Dept for details, price and delivery.

## IFSEC 2008 Security Exhibition

Jablotron will be exhibiting at the IFSEC security exhibition in Birmingham, UK May 12-15 and we warmly invite you to visit our stand (9087) and chat with our friendly staff. Visitors will be able to view and experience personally the Oasis wireless security system and products such as the JA-89P wireless outdoor PIR detector, JA-84P wireless PIR motion detector with a built-in camera & flash, the JA-82K control panel, the RC-87 personal wireless panic button, the JA-80X telephone line communicator, the JA-80BT Bluetooth interface, and the GD-04 GSM communicator.

## Public Holidays

The 1<sup>st</sup> and 8<sup>th</sup> of May 2008 (Thursdays) are public holidays in the Czech Republic so Jablotron will be closed for business on these days.
