

JA-160PC (90) Wireless PIR motion detector with a 90° verification camera

The JA-160PC (90) is wireless component of the **JABLOTRON** system. It serves for the detection of human movement in building interiors and visual alarm confirmation. The camera takes colour photos with a resolution of up to 640 x 480 pixels. Photos are taken following detected movement, which ensures that the cause of the alarm is always recorded. The camera is equipped with a visible flash for taking photos in the dark. The detector should be installed by a trained technician with a valid certificate issued by an authorised distributor.

Installation

There should be no obstacles in front of the detector which might obstruct its view of the protected area:

- subjects, which quickly change temperature (e.g. heating appliances)
- subjects, which move (e.g. curtains hanging above a radiator, robotic vacuum cleaners, pets)
- no obstacles in front of the detector which might obstruct its view of the protected area
- moving pets

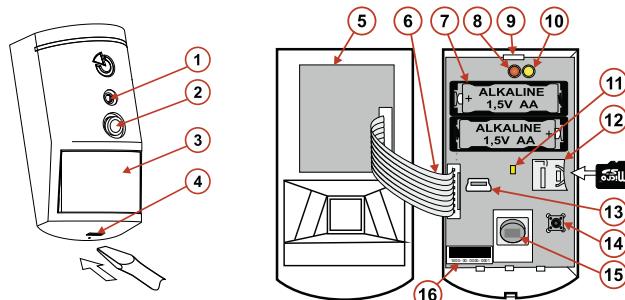

It is not recommended to install the detector:

- opposite to windows or reflectors
- in places with over-intense air circulation (close to ventilators, heat sources, air conditioning outlets, unsealed doors, etc.)

Note: Installation in the corner of a room requires more attention during testing due to possible reflection of flash in the photographed scene (especially in the dark).

Installation procedure:

1. Open the detector cover by pushing the tab (4). Avoid touching the PIR sensor inside (15) – you could damage it.
2. Take out the PCB – it is held by a tab (9).
3. Screw the rear cover to the wall (vertically, cover tab down).
4. Re-insert the PCB and plug the connecting cable (6) into the connector on the PCB. Insert the batteries (mind the correct polarity).
5. There must be a JA-11xR radio module installed in the control panel.
6. Close the detector cover and test its functionality. In order to comply with norms, the cover tab (4) must be secured with the supplied screw.

- 1 – flash for illumination
- 2 – camera lens
- 3 – PIR detector lens
- 4 – cover tab
- 5 – camera module
- 6 – connection cable
- 7 – battery holder
- 8 – red LED indicator
- 9 – PCB tab
- 10 – yellow LED
- 11 – yellow LED indicator of Micro SD card
- 12 – micro SD memory card
- 13 – mini USB connector
- 14 – tamper contact
- 15 – PIR sensor
- 16 – production code

Figure: Description of internal and external parts of the product

Enrolment to the system and settings

According to the type of control panel use recommended software or application - see control panel manual.

Technical specifications

Power.....	2 x alkaline battery type LR6 (AA) 1.5 V (alternatively 2x AA lithium battery, 1.5 V)	Typical (LQ) photo transmission time to the control panel..... up to 20 s (10 s)
Typical lifetime.....	about 2 years (1 activation and 1 series of photos a day)	Typical (HQ) photo transmission time to the control panel..... up to 130 s (60 s)
	Please note: Batteries are not included	Typical photo transmission time to the server..... 15 s / GPRS; 2 s / LAN
LowBatt voltage alkaline batteries.....	<2.52 V	Dimensions, weight (without batteries)..... 110 x 60 x 55 mm, 110 g
LowBatt voltage lithium batteries.....	<2.62 V	Operational temperature range -10 °C to +40 °C
Quiescent current consumption.....	2 µA	Operational environment..... Indoor general
Maximum current consumption.....	.870 mA	Average operational humidity..... 75% RH, non-condensation
Recommended installation height.....	2.5 m above the floor	Classification..... security grade 2 / environmental class II (according to EN 50131-1)
PIR Detection angle / detection coverage.....	90° / 12 m	Certification body..... Trezor Test s.r.o. (no. 3025), KIWA Nederland b.v.
Horizontal camera capture angle.....	90°	Complies with..... EN 50131-1, -2-2, -5-3, -6, EN 50130-4, EN 55032, ETSI EN 300 220-1, -2, EN 62368-1, EN IEC 63000, T 031
Range of the flash.....	max. 3 meters	Can be operated according to ERC/REC 70-03
Resolution of the camera.....	LQ 320 x 240; HQ 640 x 480 pixels	Recommended screw 2x ø 3.5 x 40 mm (countersunk head)
Photo size LQ / HQ (typically).....	2-20 kB / 2-64 kB (6 kB / 35 kB)	

JABLOTRON a.s. hereby declares that the product JA-160PC (90) is in compliance with the relevant Union harmonisation legislation: Directives No: 2014/30/EU, 2014/35/EU, 2014/53/EU, 2011/65/EU. The original of the conformity assessment can be found at www.jablotron.com - Section Downloads.

Note: Disposing of this product correctly will help save valuable resources and prevent any potential negative effects on human health and the environment, which could otherwise arise from inappropriate waste handling. Please return the product to the dealer or contact your local authority for further details of your nearest designated collection point.
