

GD-04 “David” additional modules

These modules allow functional extensions of the GD-04 David communicator. See the GD-04 manual for further details, including the technical specification. The modules are designed to work exclusively with the GD-04 communicator and according to the GD-04 manual.

- The **GD-04A module** provides **backup** operation.
- The **GD-04D module** allows relay remote control via **DTMF** codes keyed-in on the phone keypad.
- The **GD-04R module** allows **radio** communication with wireless devices of the OASiS system.
- The **GD-04P module** allows you to connect David to a PC and to program the device using GDLink software.

Specification

Can be operated according to

ERC REC 70-03

Safety

EN 60950-1

EMC

EN 55022 and EN 50130-4

Radio transmissions

ETSI EN 300220
