

## MCO-04 Car alarms output module

The product is an extension module for CA-2103 and CA-345 series car alarms for controlling appliances in the vehicle - independent heating, power supply for additional detectors, control of optical signalling and other functions.

### Tekniske specifikationer

**Supply voltage**

12/24 V (10-32 V) DC

**Current consumption**

8 mA

**Operational temperature range**

-40 °C to +85 °C

**Dimensions without wiring**

17 x 47 x 66 mm

**Weight**

34 g

**Maximum switched current**

200/10 mA

**Comply with ECE Regulation No: 010.06**
