

## CA-551 Tilt detector

The CA-551 tilt detector detects movement of the car in three axes. No mechanical parts are used in the detector. Detection is achieved through electronic acceleration metering. The digital analysis used in this detector ensures high resistance against the false alarms.

### Technical specifications

<b>Power</b>	9-32 V (DC)
<b>Power consumption</b>	typ.1 mA/12V/24V
<b>Operating temperature</b>	-40 °C to +85 °C
<b>Maximum sensitivity (for all axes)</b>	1° (built-in digital filter)
<b>Output</b>	negative pulse with a duration of 2 sec
<b>Maximal output load</b>	80 mA
