

MCO-04 Car alarms output module

The product is an extension module for CA-2103 and CA-345 series car alarms for controlling appliances in the vehicle - independent heating, power supply for additional detectors, control of optical signalling and other functions.

Tekniset tiedot

Supply voltage

12/24 V (10-32 V) DC

Current consumption

8 mA

Operational temperature range

-40 °C to +85 °C

Dimensions without wiring

17 x 47 x 66 mm

Weight

34 g

Maximum switched current

200/10 mA

Comply with ECE Regulation No: 010.06
