

MCO-04 Car alarms output module

The product is an extension module for CA-2103 and CA-345 series car alarms for controlling appliances in the vehicle - independent heating, power supply for additional detectors, control of optical signalling and other functions.

Specifické technice

Supply voltage	12/24 V (10-32 V) DC
Current consumption	8 mA
Operational temperature range	-40 °C to +85 °C
Dimensions without wiring	17 x 47 x 66 mm
Weight	34 g
Maximum switched current	200/10 mA
Comply with ECE Regulation No: 010.06
