

GS-208-CO Wired module for connection of the Ei208W(D) CO detector

This is a plug-in module designed for direct integration in the Ei208W or Ei208DW stand-alone CO detector that will enable its wired connection to a security or another system.

○ [Declaration of conformity - GS-208-CO \(PDF 316.71 kB\)](#)

Beskrivelse

The module provides galvanic isolation of the wired output from the entire detector. It provides the system with information about alarms and detector errors.

Tekniske spesifiseringer

Power supply

9 - 15 V DC

Current consumption (idle/maximum)

5 mA/5 mA

Dimensions

48 x 19 x 14 mm

Environment

II. indoor, general (acc. to EN 50131-1)

Operating temperature range

-10 °C to +40 °C

In conformity with

EN 50130-4, EN 55022, EN 50581
